

## CAMPBELLTOWN HOSPITAL REDEVELOPMENT

## **EMERGENCY DEPARTMENT MOVE**

INFORMATION SHEET | JUNE 2022

As part of the staged opening of the new clinical services building, Campbelltown Hospital's Emergency Department (ED) will relocate to Level 0 of the new building on Wednesday 29 June 2022.

The dedicated ED parking and patient drop-off zone will be maintained within the upgraded P1 car park, which is best accessed via Central Road. The P2 car park will also provide easy access to the ED and new hospital building.

The relocation will see the full closure of the current ED and existing hospital entrance point. All public entry to other Campbelltown Hospital services from this date will be via the new main entrance (Central Road) or existing Building D entrance (Parkside Crescent). Patients should liaise with their treatment team on the best access point and parking options for the relevant service.

A new public car park (P3) and hospital campus road enables easy access to the new main entrance, supported by the relocation of patient drop-off and bus services. Accessible parking spaces are available in all car parks.

For assistance navigating the hospital during the transition period, visit the Main Reception desk located in the main entrance foyer on Level 2 of the new building.

## **KEY CHANGES**

- Emergency Department moves to new building from 29 June
- Best parking for ED is P1 or P2
- Pedestrian access to ED entrance from bus stop and main entrance is via signposted walkway and lift/stairs
- General hospital access will be via the new main entrance or Entrance D only (no access via ED) from 29 June
