MOVE

TOURING YOUR NEW BUILDING

Familiarisation tours of the new building have had many teams clocking up some serious steps to check out their new areas.

The Paediatrics team have been visiting their 'penthouse' position on levels 8 through to 10, which will be known as the Children's Unit. This change of name is in line with a facility-wide move towards a simplified naming convention, making it easy for everyone to understand.

The Allied Health team had a ball getting a sneak peek of the future courtyards across all levels of the mental health units. With the water features, barbeques and basketball court soon to be installed, it's game on for our builders who are making the finishing touches.

CSSD TESTING 1...2...3...

The Central Sterilising Services Department have been hard at work, testing the five new steam sterilisers in their future space. To ensure the machines are effectively sterilising reusable medical devices for safe use in surgical and clinical procedures, a series of tests are completed.

With more than 500 instrument trays and 180 bowl sets needing wrapping in sterile barrier wraps, an amazing effort was seen from the team. On top of this work, 225 single instruments were packed in laminate/paper pouches for further testing.

Thanks to Tracey and the team for their commitment to keeping our vital hospital instruments squeaky clean! Your hard work in the new department will make for a smooth transition into the new building.

75 DAYS TO GO!

Now that's a stack.

Click [here](#) or check out the below to learn who is housed on each level of your new clinical services building.

MOVE PLANS ARE DUE

Reminder that move day plans are due. Send through your completed move plans to our project officers so we can get a move on.

REDtalk

Thanks to all who tuned in to our recent REDtalk staff presentation on Thursday 24 February. We loved showing you the future main entrance and Hospital Street. Watch the recording [here](#) on the intranet.
